

Flashclad promotes the use of Dulux 25 Year Warranty “Matt Finish Coatings”.

Satin and gloss finishes can highlight deflections in building lines and can also create shiny dazzling appearances in sunlight.

Note: Some regions in NZ are subject to a hard water supply which can contain higher levels of salts, calcium, magnesium etc. Hard water can leave water spot staining on dark colours. Dark colours also require additional cleaning periods to maintaining its appearance.

Updated colours below provided by Dulux 9 Feb. 2022 > Current Dulux brochures are obsolete

<b>DURATEC Solid Colours</b>	<b>ZEUS</b>
