

Flashclad promotes the use of “Matt Finish Coatings” only.

Satin and gloss finishes can highlight deflections in building lines and can also create a shiny dazzling appearance in sunlight.

Flashclad recommends the Matt finish colours below copied from Interpon’s Commercial Futura colour chart.

Note: Some regions in NZ are subject to a hard water supply which can contain higher levels of salts, calcium, magnesium etc. Hard water can leave water spot staining on dark colours. Dark colours also require additional cleaning periods to maintaining its appearance.

FUTURA RANGE - MATT	
Anodic Natural	YY223A
Asteroid Pearl	YY270A
